

Botanica

Say hello to
Australia's first
vegan probiotic cold
pressed juice range.

Now Stocked at:

QLD Made!

From our signature cold pressed green juice, to our Australia-first vegan probiotic cold press juice, everything we do at Botanica is about pioneering new ways for people to live a life full of goodness. Our new micro-organism crowd pleaser is Australia's only cold pressed juice with vegan probiotic spore, BC30

(Bacillus Coagulans). Internationally validated to support digestive functions and immunity by improving the health of the human microbiome. Oh, and it's scientifically proven to survive 10x longer than yoghurt cultures.

Experts in cold pressed

We have developed our cold pressed juice passion and expertise over the past 6 years. Everything is produced in our very own Queensland juicery here in Toowoomba, naturally preserving the vitamins and flavours without using heat or additives - giving all Botanica juices a 100-day chilled shelf life

Goodness inside & out

Botanica authentic cold pressed juices are made naturally and sustainably with 100% Australian fruit and vegetables, hand-sourced from the doorstep of Queensland's salad bowl, the Lockyer Valley. We also use 100% recyclable plastics

100% Farm freshness

Our juicery is just 10 minutes from our farms ensuring the freshest and cleanest juices in Australia. What we harvest in the morning, we produce by lunchtime.

THE WORLD'S MOST VITAMIN ENRICHED COLD PRESSED JUICE

For over 6 years, we have been the Australian leaders in cold pressed juices. Our products are made locally at our juicery in Toowoomba, on the edge of the farms in The Lockyer Valley, QLD; the home of Australia's salad bowl. Botanica apply years of artisan cold press knowledge to ensure rich chlorophyll, antioxidants and omega3s are extracted at optimum yield. That's our passion and we live by it. We strongly believe the calibre of our customers is a true testament of our commitment to food safety, freshness, flavour and nutrition, which we strive to deliver every-single-day.

Botanica partner with Australian farmers who we work tirelessly with to source the cleanest, freshest and in season, all Australian, fruit and veggies. Because of this, we feel confident we can offer the most nourishing and refreshing cold pressed juices in the country. Botanica have adopted a unique cold pressure processing technology called high pressure pasteurisation, or otherwise known as HPP. HPP allows for the most natural and clean label manufacturing in the world, and does not require the use of heat or preservatives. HPP preserves vitamins, enzymes, amplifies flavours and freshness, where thermal pasteurisation destructs the goodness.
